

MassMutual Microsoft 365 Copilot Prompt Packet

Use only approved sources and tenant-approved Copilot surfaces. Verify consequential claims before sharing.

Swap the Northstar details for your real work. The structure is the point.

GCSE prompt anatomy

- **Goal:** the response you want
- **Context:** why it matters and who is involved
- **Source:** what Copilot may use
- **Expectations:** format, limits, and quality bar

Day 1: AI Champions

Slide 11: Prove the boundary before you trust it

1. What do we know about Northstar Life's June paid claims result?
2. Now that Northstar_Monthly_Review_Notes.docx is attached, what is this document about? One sentence, and name your source.

Slide 13: Quick vs complete, side by side

3. Summarize this.
4. Using the attached Northstar Life monthly review notes, draft a five-bullet operating summary for a finance director. Separate verified facts from questions.

Slide 19: Let Copilot interview you

5. Interview me one question at a time to build my Copilot custom instructions: my role, who I usually write for, the tone I want, and the outputs I make most often. Then draft the instructions for me to review before I save them.
6. Now rewrite my custom instructions in the first person, under 120 words, and mark anything you inferred rather than heard from me.

Slide 20: Teach Copilot your email voice

7. Review my last 25 sent emails in my Sent folder and write my voice custom instructions to use for future email drafts.
8. Show me three sentences from my sent mail that shaped this profile, so I can check it.

Slide 25: Refine without restarting

9. Critique this response for unsupported claims, missing evidence, and ambiguous wording. Do not rewrite yet.
10. Now rewrite it for a finance director. Keep verified facts separate from hypotheses and open questions.

Slide 27: Quality sprint: verify the pre-read

11. List every name, number, and date in this draft so I can verify each one against the source.

12. Rewrite only the sentences this draft cannot support, marking each one as verified, hypothesis, or blocked.

Slide 31: Fire the oven at 1:07

13. Prepare a cited briefing for a life-insurance leadership team on three practical approaches to improving digital policyholder service. Separate evidence, interpretation, and open questions.

14. Before finalizing, identify conflicting evidence and explain how it affects confidence.

Slide 33: Summarize the committee thread

15. Summarize the thread in Northstar_Claims_Committee_Thread.docx: what changed, what the committee needs from us, and the single next step.

16. List every question the claims committee asked, as bullets, in their words.

Slide 35: Draft the committee reply

17. Using this summary, draft a reply to the claims committee confirming what we can verify today and what remains open. Professional tone, under 200 words, two concrete next steps.

18. Now check this reply against Northstar_Life_Monthly_Performance.xlsx: quote any number I should not send without verifying.

Slide 36: Retarget the reply for the CFO

19. Rewrite this reply for the CFO: lead with the claims impact and what remains unverified, five sentences max.

20. Now name in one line what I am asking the CFO to decide.

Slide 39: Open the oven

21. Which of these findings would you not put in front of a leadership team without a second source?

Slide 42: Save it once, run it daily

22. Turn this into a reusable prompt: replace the Northstar details with placeholders I can fill in each month.

23. Every workday at 4:45 PM, review my calendar and unread mail from today and draft a three-bullet end-of-day summary: what moved, what is stuck, and tomorrow's first task.

Slide 47: Coach without taking over

24. What outcome are you trying to produce, for whom, and what source should Copilot be allowed to use?

25. Which sentence would cause the most harm if it were wrong? Show me how you verified it.

Slide 51: The check nobody owns

26. Interview me about a recurring work task. Ask one question at a time about trigger, sources, decisions, output, verification, exceptions, and owner. Then propose a five-stage workflow.

27. Challenge the workflow: where could a fluent but unsupported claim pass through? Add a control there.

Slide 53: Copilot as design critic

28. Critique this AI Champion Launch Card. Identify one unclear outcome, one unsupported assumption, one missing verification step, and one risk that needs escalation.

29. Rewrite only the experiment section so it can be tested in 30 days without new system access or sensitive data.

Day 2: Finance

Slide 7: Ask the workbook what it holds

1. What does the PerformanceData table contain? Describe the columns and the period covered.

2. Add a column to PerformanceData showing Actual minus Plan for each row.

Slide 8: See the shape before the story

3. Which rows in PerformanceData look unusual compared to the rest of the year? Explain why you flagged each one.

4. Create a chart of Paid Claims by month, Actual versus Plan.

Slide 9: Explain the formula you inherited

5. Explain the formula in the selected cell in plain language.

Slide 11: Tell Excel how you work, once

6. Format currency as US dollars with thousand separators and no decimals. Call variances favorable or unfavorable, never positive or negative. When you state a number, name the sheet and the row it came from.

7. Summarize the June rows in PerformanceData.

Slide 12: Promote the clause to a rule

8. Add a workbook rule: revenue below plan is unfavorable, and claims or operating expense above plan is unfavorable.

9. Rank the five largest unfavorable variances in PerformanceData.

Slide 18: Begin with an analysis contract

10. Using PerformanceData, rank the five largest unfavorable variances by absolute dollars. Revenue below plan and Claims or Expense above plan are unfavorable. Show amount, percentage, month, and category. Do not infer causes.

11. For each finding, cite the exact row or formula and flag any data-quality issue that could change the result.

Slide 21: Create the first analysis

12. Show the calculation for the largest variance and cite the month and category row used.

Slide 23: Refine for management attention

13.Reframe the analysis for a finance director. Lead with the three material findings, quantify each, and separate supported explanations from hypotheses.

14.After opening the review notes, state which hypotheses the notes support, contradict, or leave unresolved. Do not upgrade a hypothesis to fact without direct evidence.

Slide 28: Make Copilot help you challenge Copilot

15.Create a claim-verification ledger with columns: claim, source, calculation/check, status, uncertainty, owner. Include only material findings.

16.For each claim, explain what evidence would contradict it or lower confidence.

Slide 31: Draft from the verified ledger

17.Using only claims marked Verified or Supported in the attached ledger, draft a one-page finance director brief: headline, three material findings, risks, open questions, and decisions needed.

18.Audit the draft against the ledger. Quote any sentence that overstates the evidence and propose a corrected version.

Slide 35: Take the keeps home

19.Draft a forecast commentary for Q3 Paid Claims using only the trend visible in PerformanceData; label every assumption.

Prompt inventory: Day 1 29 · Day 2 19 · generated from the exact rebuilt slide sources on 2026-09-04.
