

Northstar Finance Fallback Outputs

Prepared training outputs for the paired or observe route. Not live Copilot results.

Finance CREATE Fallback Output

Prepared fallback. Fictional training material. Not a live Copilot result.

Ranking basis: unfavorable absolute dollar amount. Revenue below plan and Claims or Expense above plan are unfavorable.

Rank	Month	Category	Plan	Actual	Unfavorable	%	Source row
1	Jun	Paid Claims	\$790,000	\$858,000	\$68,000	8.6%	18
2	Mar	Paid Claims	\$750,000	\$812,000	\$62,000	8.3%	9
3	Feb	Paid Claims	\$735,000	\$790,000	\$55,000	7.5%	6
4	May	Paid Claims	\$775,000	\$824,000	\$49,000	6.3%	15
5	Jun	Premium Revenue	\$1,375,000	\$1,332,000	\$43,000	3.1%	17

Independent check

June Paid Claims: $\$858,000 - \$790,000 = \$68,000$ unfavorable; $\$68,000 \div \$790,000 = 8.6\%$.

The table establishes materiality and arithmetic. It does **not** establish business cause.

Finance REFINE Fallback Output

Prepared fallback. Fictional training material. Not a live Copilot result.

Three material findings

- June Paid Claims:** \$68,000 unfavorable to plan (8.6%). Arithmetic is Verified. The approved notes do not establish the June cause.
- March Paid Claims:** \$62,000 unfavorable to plan (8.3%). The approved notes support that March included two large-loss events, but they do not establish a persistent trend.
- February Paid Claims:** \$55,000 unfavorable to plan (7.5%). No approved explanation is present; the cause remains a Hypothesis or open question.

Evidence-status view

Explanation	Status	Why
March variance coincided with two confirmed large-loss events	Supported for March	Directly stated in approved notes; persistence is not established
Persistent claims deterioration explains June	Hypothesis	No approved trend or June claim-detail evidence
June technology expense includes milestone and contractor timing	Supported with limitation	Directly stated; final allocation remains pending
Outreach caused May renewal outperformance	Hypothesis	Team belief exists; controlled attribution does not

Management questions

- What claim-detail and trend evidence would explain February and June Paid Claims?
- When will the June technology allocation be final, and who approves it?
- What channel-level evidence is needed before acting on the conversion shortfall?

Finance Director Brief: Northstar Monthly Review

Prepared fallback. Fictional training material. Not a live Copilot result.

Headline

Paid Claims produced the three largest unfavorable dollar variances in the period. The arithmetic is verified; the available notes explain March's event context but do not establish a persistent or June-specific cause.

Material findings

- 1. **June Paid Claims:** \$68,000 unfavorable to plan (8.6%), Verified from PerformanceData.
- 2. **March Paid Claims:** \$62,000 unfavorable to plan (8.3%), Verified. Two March large-loss events are Supported context, not evidence of a persistent trend.
- 3. **February Paid Claims:** \$55,000 unfavorable to plan (7.5%), Verified. The business cause remains unresolved.

Risks and open questions

- Claim-detail and trend evidence is missing for February and June.
- June technology expense is \$39,000 unfavorable; final allocation remains pending.
- Channel-level evidence for April and June conversion is not approved for this review.

Decisions needed

- **Claims Finance:** provide the claim-detail and trend analysis for February and June.
- **Controller:** close or reclassify the June technology allocation.
- **Revenue Finance:** identify the approved channel analysis needed for the conversion question.

No unsupported explanation is presented as fact.
